The Power to Control

Transportable dispatch solutions from Catalyst Communications Technologies enable dispatchers to communicate with field operations from anywhere
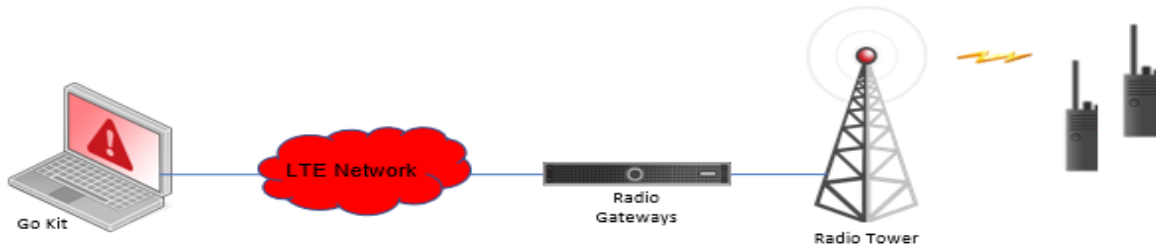

Maintaining Dispatch Communications for Critical Communications is essential regardless of circumstances – even when Dispatchers need to relocate from their normal Operations Center. Whether safety protocols to address COVID-19 concerns, building evacuation for fire, mold, threats, or any other reason, or remote field operations where Dispatch needs to be closer to First Responders, rapid deployment of a Dispatch solution is a necessary tool for any organization responsible for critical communications.

Catalyst's Propulsion™ Go Kits are specifically designed to work with Catalyst's Propulsion™ Dispatch software. Connectivity into an Agency's Network can utilize LTE, Wi-Fi or Ethernet. Custom network solutions can be designed for Go Kit operations depending on the customer's specific requirements.

Propulsion™ Go Kit

With a built-in touchscreen monitor, keyboard, trackpad, microphone and speaker, the Propulsion™ Go Kit is a complete Dispatch Console that's ready to go anywhere and simple to set up.

In a typical configuration, the Propulsion™ Go Kit connects to an LTE Network with a Cradlepoint router for connectivity to Catalyst Radio Gateways.

Propulsion™ Go Kit Components

- ❖ Premium Pelican Case
- ❖ Windows® Personal Computer with Wi-Fi
- ❖ Dell Touchscreen Monitor
- ❖ AC Power
- ❖ PTT button, footswitch also available
- ❖ Gooseneck microphone
- ❖ Galaxy speaker (one)

- ❖ 3.5mm mini jack for optional PA connection
- ❖ Keyboard, mouse and trackpad
- ❖ Task Light for night use
- ❖ Ethernet for wired connection
- ❖ ~35 pounds (depending upon exact configuration)
- ❖ Case size 28.87 x 16.77 x 9.12 in
- ❖ Optional Cradlepoint Router
