

GO TAB Dispatch Tablet (()) with IP|Soft™

A rugged Tablet for Remote Dispatch from anywhere, compatible with every Catalyst Gateway

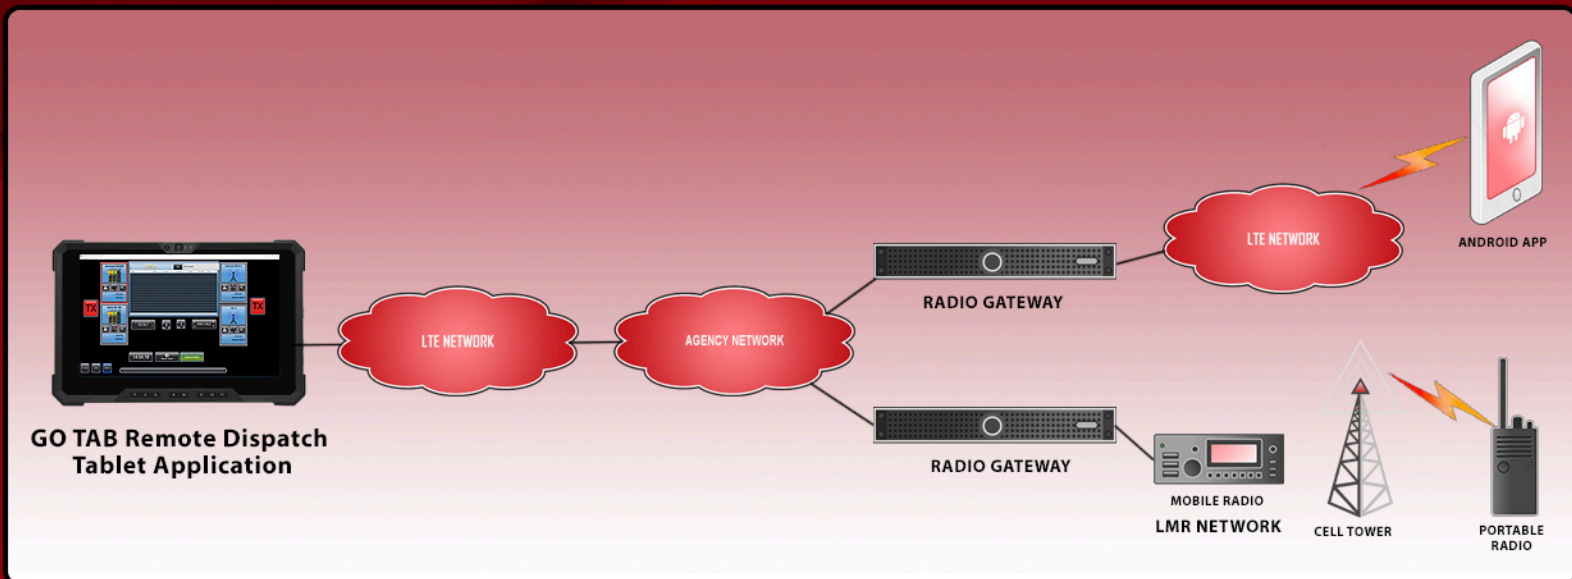

GO TAB Dispatch Tablet with IP|Soft™ allows users to engage Dispatch Operations with just a wireless Bluetooth(r) headset to set up remote, temporary, back-up, mobile and training positions quickly and securely. The IP|Soft™ Dispatch Software provides quick access to up to four radio resources, which can be any combination of Land Mobile Radio (LMR or LTE based Mission Critical Push to Talk applications on PTT networks including FirstNet(r) Built with AT&T and Southern Linc's CriticalLink™.

GO TAB connects with these radio networks securely, using VPN technology through a wired connection to the Internet or over wireless networks through CradlePoint LTE Routers.

The changing environment of the Dispatch community and the experience of remote operations during the Covid pandemic has demonstrated the need for remote dispatch capabilities, including work from home alternatives for Dispatchers. GO TAB Dispatch tablet with IP|Soft™ is one solution among many from Catalyst that support the many different remote Dispatch applications for today's challenging Dispatch Environment.

- **Up to Four Radio Resources, any combination of LMR and LTE MCPTT**
- **Up to two dynamic (ad hoc) patches can be created, stored and activated**
- **Call History with Recorded Audio and Replay**
- **Handheld, Desktop or Wall Mount configurations**
- **Wireless Headset Accessory**
- **Select and Unselect Volume Control, master and individual resource**
- **Touch Screen**

GO TAB Dispatch Tablet with IP|Soft™ from the leader in Mission Critical Communications

In a typical configuration from a remote Dispatch location or Work From Home environment, GO TAB connects to your organization's IP Network through a wireline Internet connection or wireless LTE network with Cradlepoint Routers.
