The Power to Control

Transportable dispatch solutions from Catalyst Communications Technologies enable dispatchers to communicate with field operations from anywhere

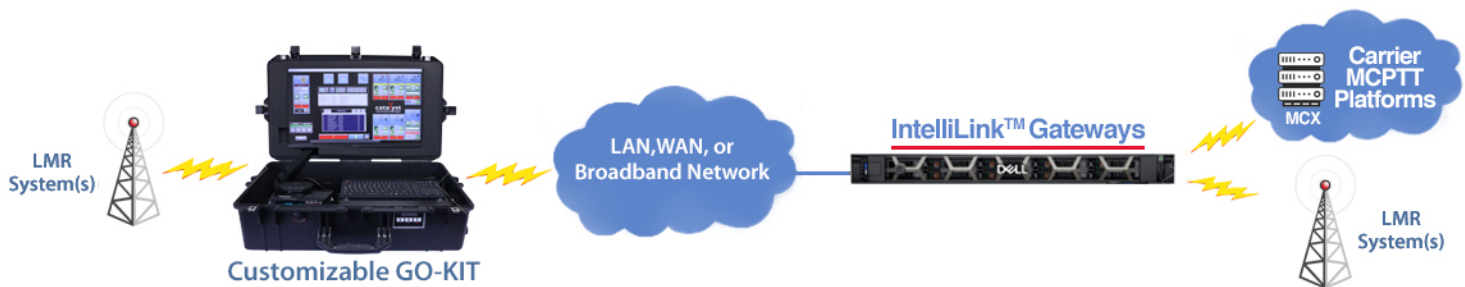

Maintaining Dispatch Communications for Critical Communications is essential regardless of circumstances even when Dispatchers need to relocate from their normal Operations Center. Whether safety protocols to address health concerns, building evacuation or remote field operations where Dispatch needs to be closer to First Responders, rapid deployment Dispatch solutions are a necessary tool for any organization responsible for critical communications.

Catalyst's Go Kits are specifically designed to work with Catalyst's Propulsion™ Dispatch software. Backhaul connectivity to an Agency's Network can utilize Broadband (Wi-Fi, LTE, 5G) or Ethernet. Custom solutions can be designed depending on a customer's specific operational requirements.

Propulsion™ Go Kit

With a built in touchscreen monitor, keyboard, trackpad, microphone and speaker, the Propulsion™ Go Kit is a complete Dispatch Console that's ready to go anywhere and simple to set up.

Propulsion™ Go Kit Components

- Premium rugged travel case
- Solid State Drive Windows PC
