Incident Commander Element (ICE) V2.0

Local Repeater Mode

- Rebroadcast low powered signal from a portable radio at 35/50 Watts
- Enhances in-building coverage for fire ground, etc.
- Records audio and call history locally
- Unit IDs of Trunked P25 and Talk Around logged per PTT

Digital Vehicular Repeater Mode

- All Local Repeater Functions plus:
- Pass audio between Talk Around & Trunking System
- Extends Coverage of Portable Radios
- Dynamically manage the flow of the audio to prevent loss
- Allows ECC and Approaching Responders to Monitor On-scene Communications
